Coastal Fertility Medical Center (CFMC) has been Orange County's leading provider of reproductive care to infertility patients since 1982, and for good reason. CFMC and its dedicated staff are widely recognized for their compassion, as well as their special attention to the individual needs of their patients. Founder Dr. Lawrence B. Werlin is widely recognized as Orange County's top fertility guru and one of the nation's most noted Reproductive Endocrinology & Infertility (REI) specialists. This compassionate and skilled physician is a pioneer in the use of Preimplantation Genetic Diagnosis (PGS/PGD), and is considered a nationally noted expert in its application. With his shock of white hair and endless collection of Rolling Stones memorabilia, "The Werl," as he is affectionately referred to by patients and friends, has

made baby making his business for over three decades. "

CFMC offers free in-house seminars for the general public. Every month, Dr. Werlin and his staff at CFMC gather to welcome prospective patients seeking information on the fertility options available to them. CFMC combines convenience, compassion and technology with its on-site state-of-the-art laboratories and surgery center to help patients overcome the heartbreak of infertility. Fertility testing and treatment is often a difficult time for patients as they are unsure if their dream of having a child is possible. "I am honored to have spent the past three decades helping couples work through these challenges, and to help bring new life to loving families."
